PERFECT PACKAGE

QuikPak Tube & SealDry Closure with Desiccant

A Complete Solution Provider for Pharmaceutical Packaging

Parekhplast India Limited is a leading manufacturer of plastic packaging for the pharmaceutical, nutraceutical and healthcare industry offering a wide range of effervescent tubes and spiral desiccant caps to customers worldwide under the brand name of QuikPak and SealDry.

Parekhplast has 3 world class ISO 9001:2008 and food safety (FSSC 22000) certified manufacturing facilities and has been in this business vertical for over 3 decades.

Our QuikPak tubes and SealDry closures can give you better visibility and customer loyalty due to a large range of decoration options available. Customers shall benefit from easy handling, while manufacturers can optimize their supply chain while ensuring the highest product safety.

Obsessed with Quality

Shortest Lead Time

Longer Shelf Life

QuikPak Effervescent Tablet Tubes

QuikPak effervescent tablet tubes are made to protect pharmaceutical and nutraceutical products from moisture and breakage. These are user-friendly with appealing designs and can come in a variety of sizes.

The effervescent tablet tubes that we supply are designed with extreme intricacy. We can also provide tubes with various types of decoration such as shrink sleeving, heat transfer labeling as well as offset printing. These tubes are made of polypropylene (PP) with a polyethylene (PE) cap which offers a perfect fit to your packaging requirement.

SealDry Closures

The SealDry spiral desiccant closures for our 29mm QuikPak tubes provide maximum protection while enhancing the shelf life of your product. SealDry caps come with an inbuilt tamper evident ring which can protect the integrity of your product.

Desiccants are incorporated directly into the closure to rapidly and thoroughly absorb moisture within the effervescent tablet tube thus extending shelf life and ensuring that your product quality remains intact. The spiral design of the cap helps in keeping the product in place during transportation.

Our desiccant caps come with Silica gel or Molecular Sieve or both to prevent from humidity and moisture. The quantity of the silica gel may range 1g to 2.5g. SealDry caps are available with and without the spiral feature.

These closures are available in a wide variety of colours & can be specially matched to your shade requirement.

Our Range of Tubes

REFERENCE NUMBER	SIZE (MM)	OUTER DIAMETER (MM)	TYPE OF CLOSURE	NUMBER OF TABLETS
PM0109	29 x 144	29.00	Spiral Desiccant	20
